User Survey on the Effectiveness of LLM4Workflow 2.0: Automated Workflow Model Evaluation with LLM Generated Rubrics

This questionnaire aims to evaluate the effectiveness of an automated workflow evaluation method by collecting human judgments. You will be presented with several task descriptions and their corresponding workflow models. Please rate the quality of each workflow based on your understanding and experience. There are no right or wrong answers. Please make your judgments independently according to the task requirements. All responses will be used only for research purposes and will be analyzed anonymously.

Q1. What is your highest level of education?

- ☐ **Bachelor's degree**
- ☐ **Master's degree**
- ☐ **Doctoral degree**
- ☐ **Other: _____**

Q2. What is your academic major or field of study?

- ☐ **Computer Science**
- ☐ **Software Engineering**
- ☐ **Artificial Intelligence**
- ☐ **Other related field: _____**
- ☐ **Other: _____**

Q3. Do you have any programming or software development experience?

- ☐ **None**
- ☐ **Less than 1 year**

- ☐ **1–3 years**

- ☐ **More than 3 years**

Q4. Are you familiar with software design or system modeling?

- ☐ **Not familiar at all**

- ☐ **Slightly familiar**

- ☐ **Relatively familiar**

- ☐ **Very familiar**

Q5. Are you familiar with workflows or DAGs (Directed Acyclic Graphs)?

- ☐ **Not familiar at all**

- ☐ **Slightly familiar**

- ☐ **Relatively familiar**

- ☐ **Very familiar**

Part 2：Workflow Evaluation Tasks

Instructions: Please read the task description and the corresponding workflow models, and then rate the workflow models.

Rating scale:

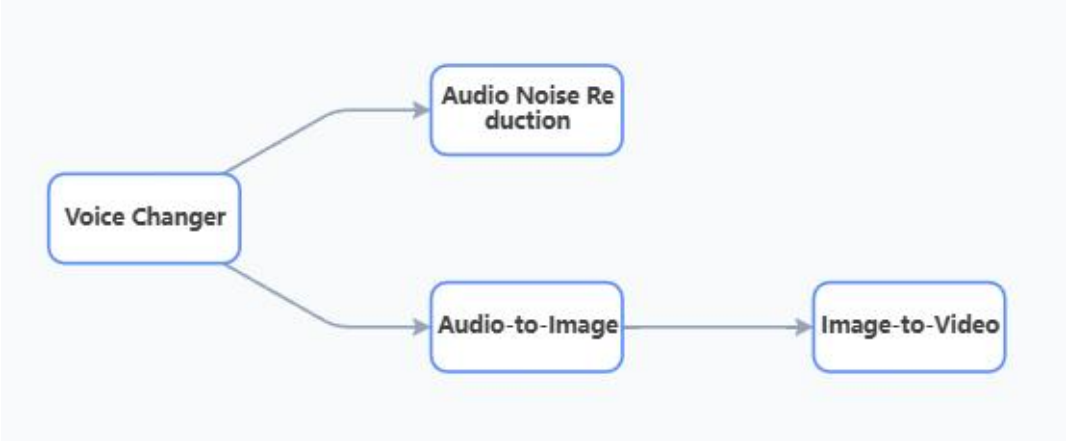
1 = Very Poor ｜ 2 = Poor ｜ 3 = Fair ｜ 4 = Good ｜ 5 = Very Good

◇ Task 1

Task Description：

I want to modify the voice in 'example.wav' to make it sound like a female voice and remove the background noise. Then, please create a waveform image of the modified audio and combine it with 'example.jpg' to create a slideshow video.

Workflow：



Please rate the following content.(1-5 points)

1. Structural Integrity & Logical Flow

2. Functional Requirement Coverage

3. Modality & Type Consistency

4. Resource & Path Optimization

5. Semantic Tool Alignment

6. Operational Robustness

7. Acoustic Processing Sequence Logic

8. Visual-Audio Content Fidelity

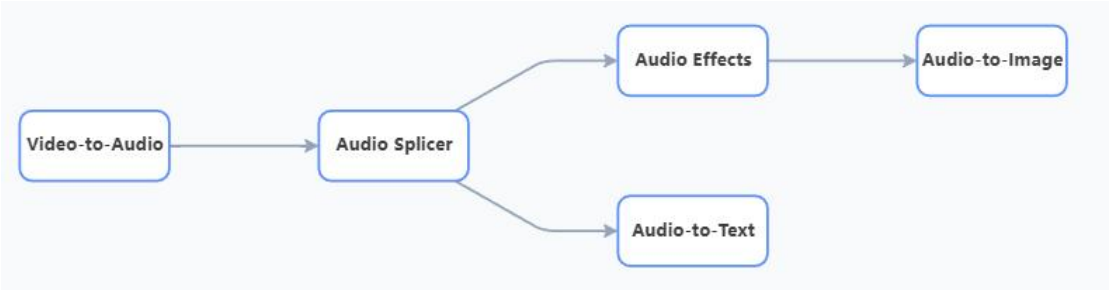
9. Temporal Synchronization and Asset Duration

◇ Task 2

Task Description：

I would like to extract the audio from the example.mp4 video, combine it with the example.wav audio file, transcribe the speech, and then apply the 'add reverb' effect to the combined audio. Finally, I would like to generate a waveform image for the final audio output.

Workflow：



Please rate the following content.(1-5 points)

1. Structural Integrity & Logical Flow

2. Functional Requirement Coverage

3. Modality & Type Consistency

4. Resource & Path Optimization

5. Semantic Tool Alignment

6. Operational Robustness

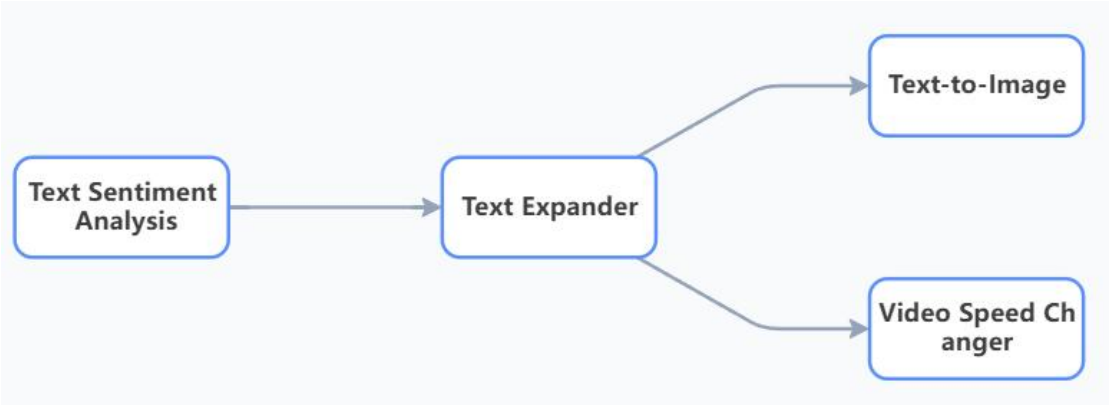
7. Transcription Signal Clarity

◇ Task 3

Task Description：

I want to create a video for my friend's birthday. I have a rough idea for the video: 'surprise party in a beautiful garden'. I want the example.mp4 video to be played at double speed.

Workflow：



Please rate the following content.(1-5 points)

1. Structural Integrity & Logical Flow

2. Functional Requirement Coverage

3. Modality & Type Consistency

4. Resource & Path Optimization

5. Semantic Tool Alignment

6. Operational Robustness

7. Sentiment-Expansion Alignment

8. Instructional Command Routing

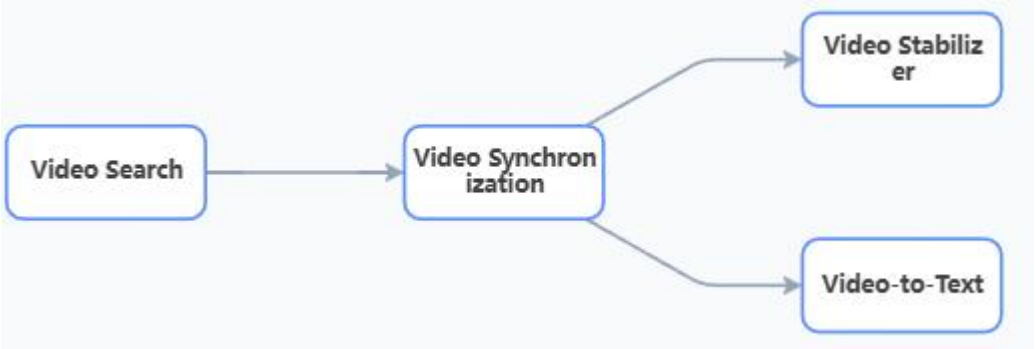
9. Visual Descriptive Enrichment

◇ Task 4

Task Description：

I need to find a video on the topic 'example', synchronize an existing voiceover example.wav with the video, stabilize the video, and transcribe the speech into text.

Workflow：



Please rate the following content.(1-5 points)

1. Structural Integrity & Logical Flow

2. Functional Requirement Coverage

3. Modality & Type Consistency

4. Resource & Path Optimization

5. Semantic Tool Alignment

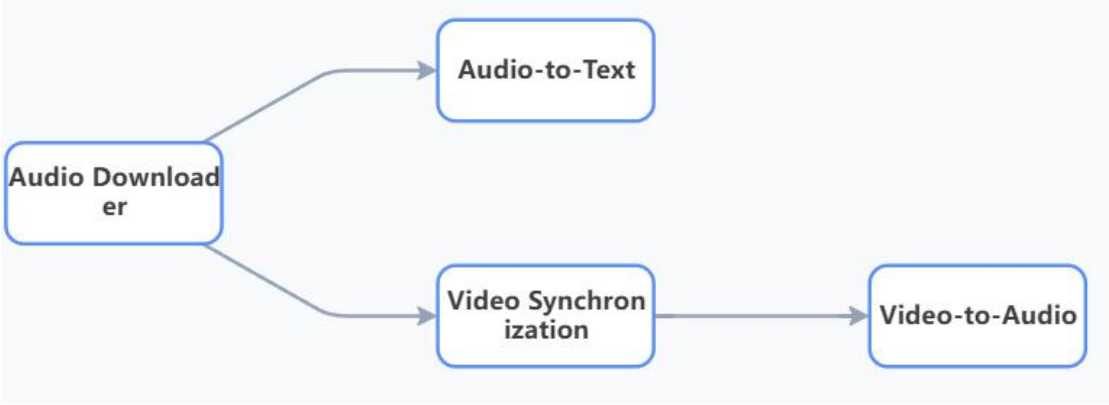
6. Operational Robustness

◇ Task 5

Task Description：

I want to download an audio file from 'https://www.example.com/audio/example.wav', transcribe it into text, and then synchronize it with a video file 'example.mp4'. After synchronization, I need to extract the audio track from the final video file.

Workflow：



Please rate the following content.(1-5 points)

1. Structural Integrity & Logical Flow

2. Functional Requirement Coverage

3. Modality & Type Consistency

4. Resource & Path Optimization

5. Semantic Tool Alignment

6. Operational Robustness

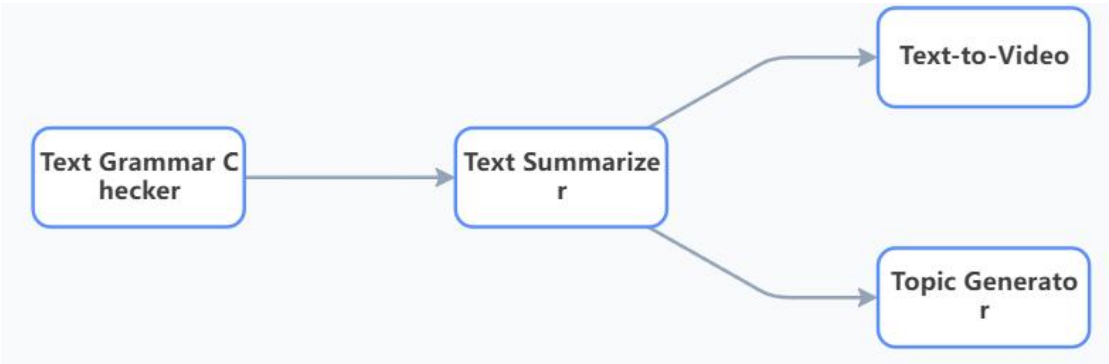
7. Temporal Synchronization Logic

◇ Task 6

Task Description：

"I need help to create a video based on my given text about environmental conservation. My text is as follows: 'Environmental conservation is verry important to save our planet. Ther are many ways to protect the nature world, like recycling, reducing water waste, and planting trees." Please check the grammar, create a summary, generate some topic ideas related to environmental conservation and finally create a video.

Workflow：



Please rate the following content.(1-5 points)

1. Structural Integrity & Logical Flow

2. Functional Requirement Coverage

3. Modality & Type Consistency

4. Resource & Path Optimization

5. Semantic Tool Alignment

6. Operational Robustness

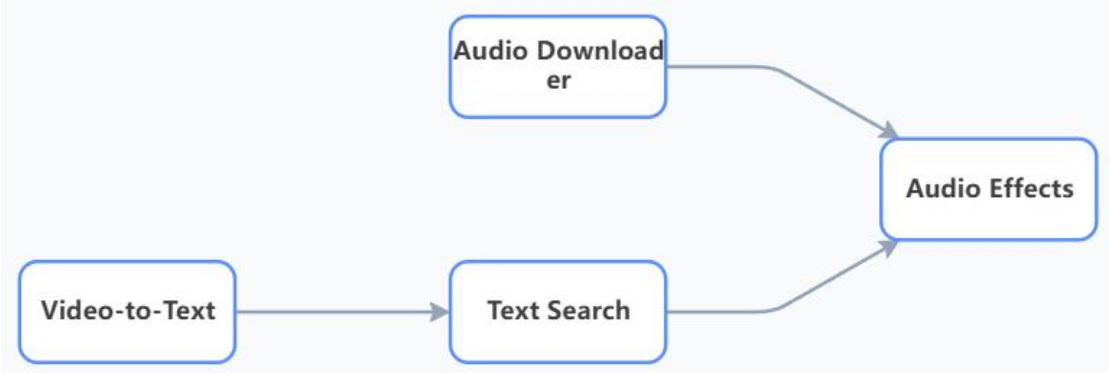
7. Semantic Fidelity across Transformations

◇ Task 7

Task Description：

I have a URL of an audio file 'example.wav'. I also have a video 'example.mp4' containing a speech on the type of audio effects I want to apply on the audio file. Please download the audio file, transcribe the speech from the video, search for the specific audio effects mentioned in the transcription, and apply those audio effects on the audio file.

Workflow：



Please rate the following content.(1-5 points)

1. Structural Integrity & Logical Flow

2. Functional Requirement Coverage

3. Modality & Type Consistency

4. Resource & Path Optimization

5. Semantic Tool Alignment

6. Operational Robustness

7. Transcription-to-Query Fidelity

8. Search-to-Effect Parameterization

9. Cross-Source Contextual Alignment

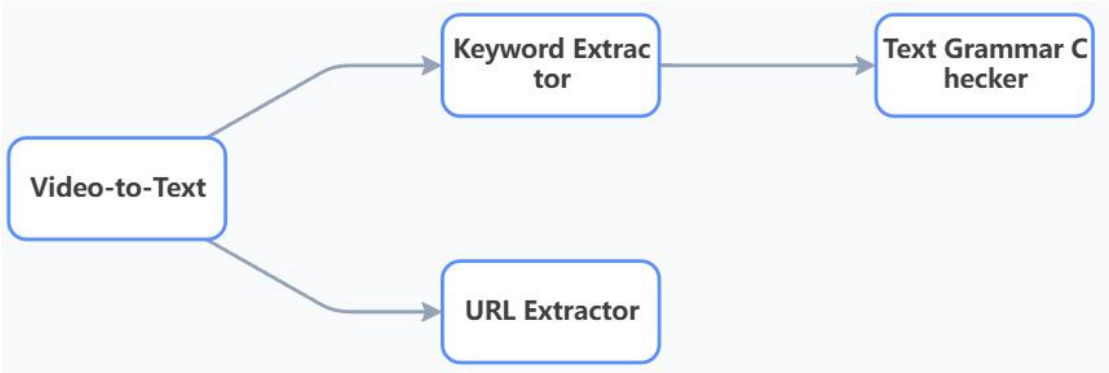
10. Effect Instruction Granularity

◇ Task 8

Task Description：

I have a video file 'example.mp4'. Please transcribe the speech in the video, extract the most important keywords and phrases, and also find any URLs mentioned in the video. Additionally, check the extracted keywords for grammatical errors and suggest corrections.

Workflow：



Please rate the following content.(1-5 points)

1. Structural Integrity & Logical Flow

2. Functional Requirement Coverage

3. Modality & Type Consistency

4. Resource & Path Optimization

5. Semantic Tool Alignment

6. Operational Robustness

7. Verbal-to-Digital URL Normalization

8. Keyword-Specific Grammar Validation Logic

9. Phrase-Level Semantic Extraction Depth

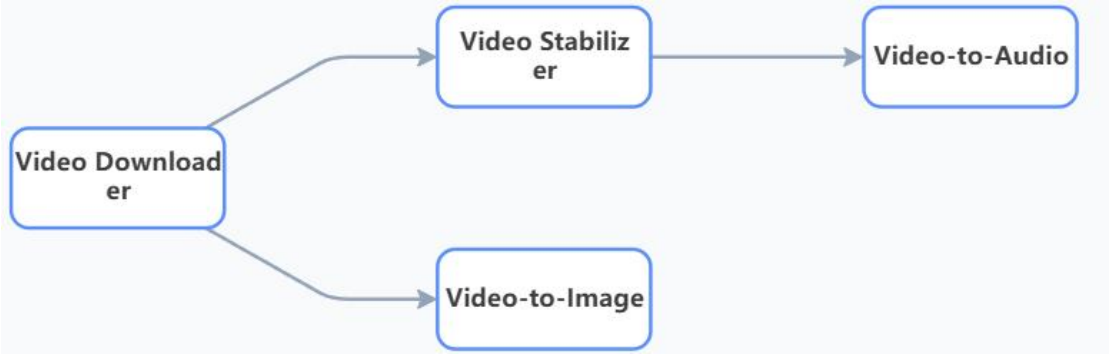
10. Transcription Fidelity for Technical Entities

◇ Task 9

Task Description：

I would like to download the video from the URL 'example.mp4', stabilize any shaky parts, extract the audio, and also retrieve a still image from the video.

Workflow：



Please rate the following content.(1-5 points)

1. Structural Integrity & Logical Flow

2. Functional Requirement Coverage

3. Modality & Type Consistency

4. Resource & Path Optimization

5. Semantic Tool Alignment

6. Operational Robustness

7. Derivative Source Optimization

8. Stabilization-Induced Visual Integrity

9. Temporal Extraction Precision

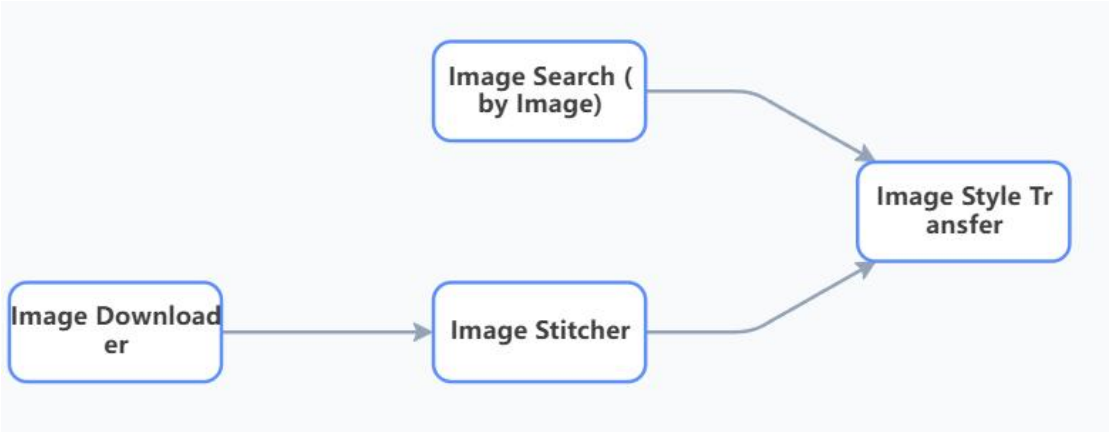
10. Multi-Asset Format Consistency

◇ Task 10

Task Description：

I want to create a collage of my favorite beach example.jpg and download an image from this URL: 'https://example.com/beach-image'. Once the collage is made, find a similar image using this reference image example_ref.jpg and apply its visual style to the collage.

Workflow：



Please rate the following content.(1-5 points)

1. Structural Integrity & Logical Flow

2. Functional Requirement Coverage

3. Modality & Type Consistency

4. Resource & Path Optimization

5. Semantic Tool Alignment

6. Operational Robustness

7. Visual Resolution and Aspect Ratio Synchronization

8. Stylistic Source Fidelity

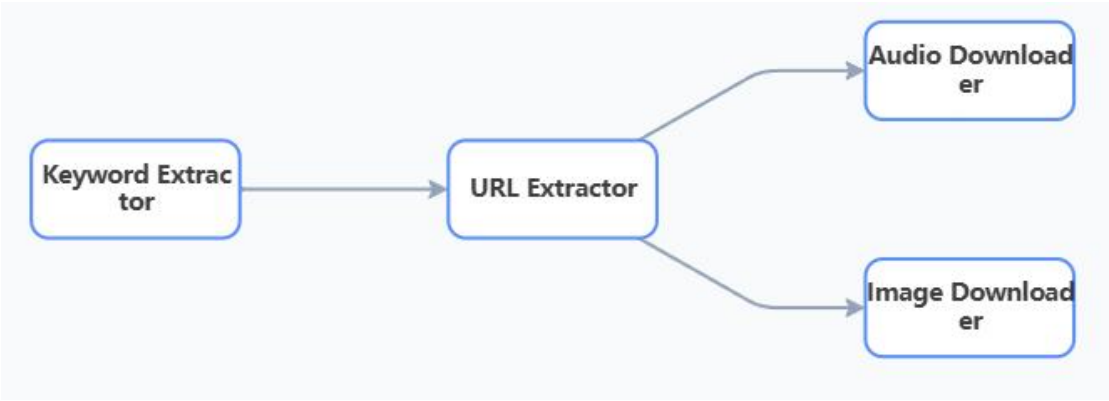
9. Thematic Content Preservation

◇ Task 11

Task Description：

I want to create a multimedia presentation about example.jpg with related images and audio files to better understand its significance.

Workflow：



Please rate the following content.(1-5 points)

1. Structural Integrity & Logical Flow

2. Functional Requirement Coverage

3. Modality & Type Consistency

4. Resource & Path Optimization

5. Semantic Tool Alignment

6. Operational Robustness

7. Semantic Bridge Quality (Image-to-Context)

8. Multi-Modal Source Viability

9. Narrative Complementarity

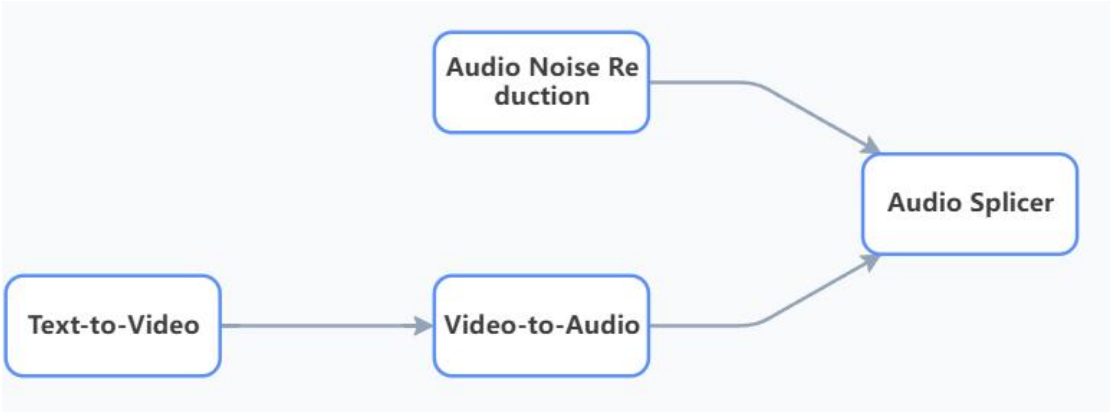
10. Intellectual Property & Source Attribution

◇ Task 12

Task Description：

I want to create an audio file with my text description 'In the year 2050, technology has advanced to unimaginable heights.' and a background music 'example.wav'. Please remove any noise in the final audio.

Workflow：



Please rate the following content.(1-5 points)

1. Structural Integrity & Logical Flow

2. Functional Requirement Coverage

3. Modality & Type Consistency

4. Resource & Path Optimization

5. Semantic Tool Alignment

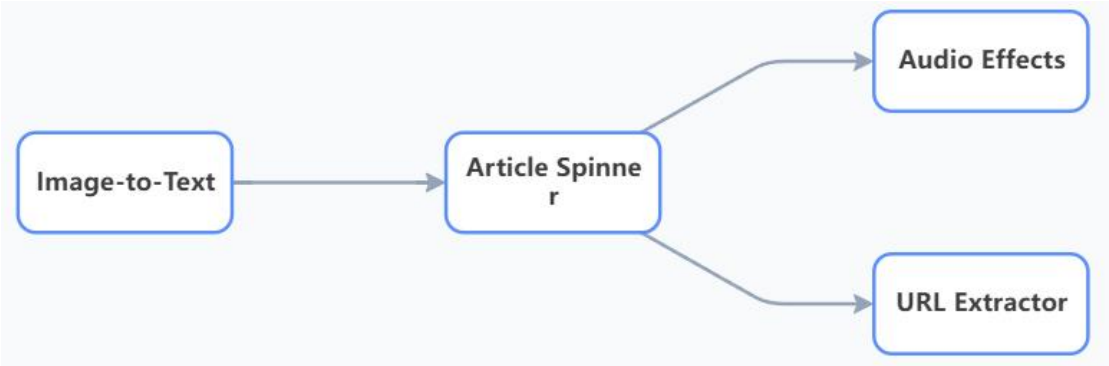
6. Operational Robustness

◇ Task 13

Task Description：

Please extract the text from the image 'example.jpg', and create a new unique article based on that. Then, extract a URL from the generated article and apply some audio effects on 'example.wav' according to the user's instructions.

Workflow：



Please rate the following content.(1-5 points)

1. Structural Integrity & Logical Flow

2. Functional Requirement Coverage

3. Modality & Type Consistency

4. Resource & Path Optimization

5. Semantic Tool Alignment

6. Operational Robustness

7. Generative Data Persistence

8. Instruction-Context Disambiguation

9. OCR-to-NLP Error Propagation

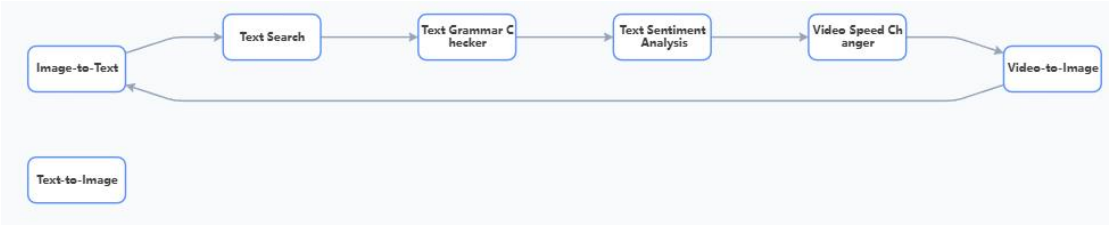
10. Cross-Modal Intent Alignment

◇ Task 14

Task Description：

I would like to find information about improving sleep quality, and create a sentiment-based video with an appropriate speed. I'd like to extract a single image from that video, and then create an image based on the text found in the extracted image. The video file provided is 'example.mp4'.

Workflow：



Please rate the following content.(1-5 points)

1. Structural Integrity & Logical Flow

2. Functional Requirement Coverage

3. Modality & Type Consistency

4. Resource & Path Optimization

5. Semantic Tool Alignment

6. Operational Robustness

7. Affective-Temporal Translation Logic

8. OCR-to-Generative Prompt Synthesis

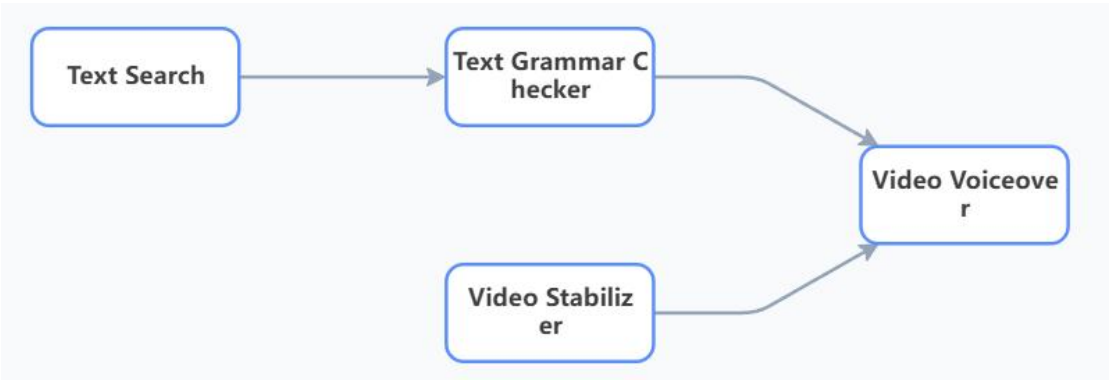
9. Temporal Extraction Strategy

◇ Task 15

Task Description：

I need to create a video presentation about the benefits of forest conservation. Please search the internet for relevant information, correct any grammatical errors, and add the voiceover to the 'example.mp4' video using the corrected text.

Workflow：



Please rate the following content.(1-5 points)

1. Structural Integrity & Logical Flow

2. Functional Requirement Coverage

3. Modality & Type Consistency

4. Resource & Path Optimization

5. Semantic Tool Alignment

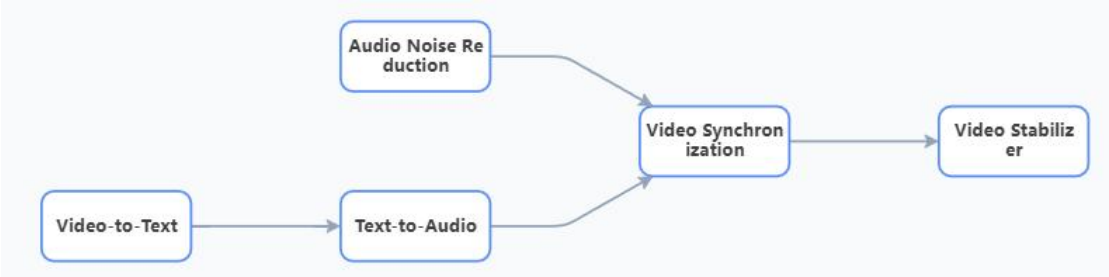
6. Operational Robustness

◇ Task 16

Task Description：

I want to create a video using example.mp4, but I want to improve its audio by transcribing the speech, removing background noise, generating a new audio file, and synchronizing it with the video before stabilizing.

Workflow：



Please rate the following content.(1-5 points)

1. Structural Integrity & Logical Flow

2. Functional Requirement Coverage

3. Modality & Type Consistency

4. Resource & Path Optimization

5. Semantic Tool Alignment

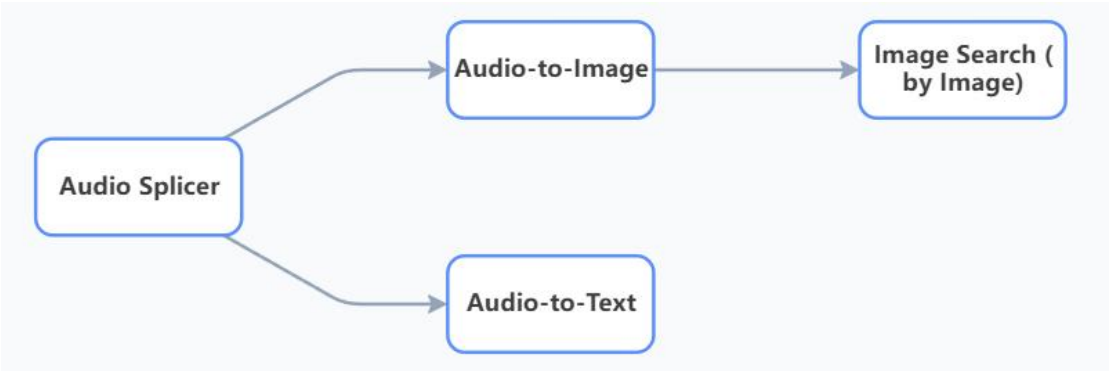
6. Operational Robustness

◇ Task 17

Task Description：

I want to combine example1.wav with example2.wav, transcribe the speech from the combined audio into text, generate a waveform or spectrogram image for the combined audio, and search for similar images using the generated image.

Workflow：



Please rate the following content.(1-5 points)

1. Structural Integrity & Logical Flow

2. Functional Requirement Coverage

3. Modality & Type Consistency

4. Resource & Path Optimization

5. Semantic Tool Alignment

6. Operational Robustness

7. Audio Merging & Temporal Integrity

8. Visual Feature Extraction Suitability

9. Search Domain & Semantic Relevance

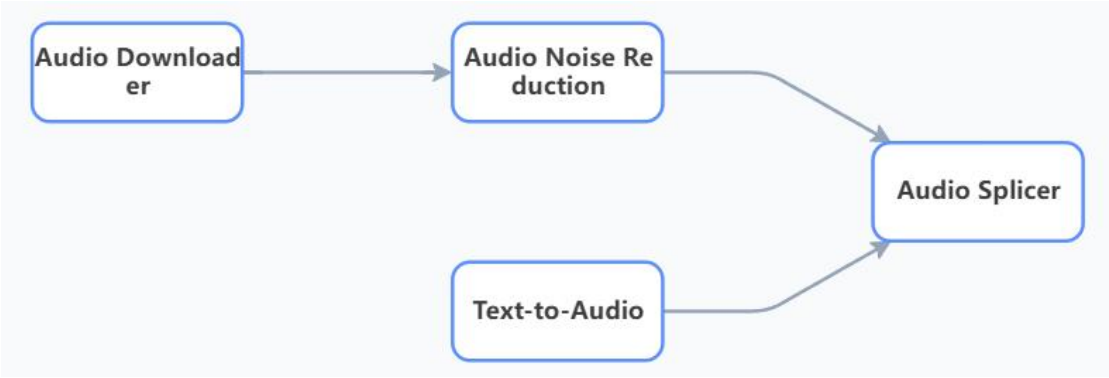
10. Transcription Continuity & Context

◇ Task 18

Task Description：

I want to create a single audio file that starts with the music downloaded from the URL 'http://example.com/music' and then plays the text 'Welcome to our podcast.' Please remove any background noise from the music before combining it with the text audio.

Workflow：



Please rate the following content.(1-5 points)

1. Structural Integrity & Logical Flow

2. Functional Requirement Coverage

3. Modality & Type Consistency

4. Resource & Path Optimization

5. Semantic Tool Alignment

6. Operational Robustness

7. Temporal Narrative Sequencing

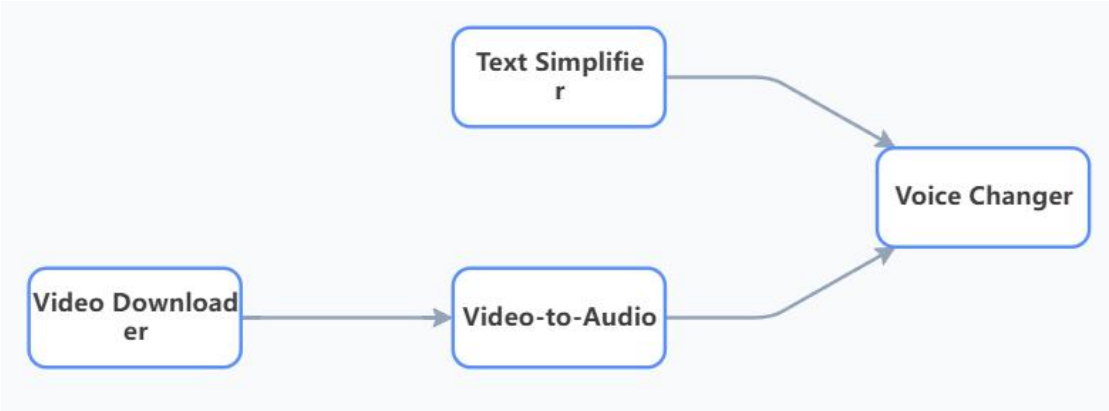
8. Audio Signal Integrity and Artifact Management

◇ Task 19

Task Description：

I have a video URL 'https://example.com/example_video.mp4', I'd like that video to be downloaded and convert that video to an audio file. Then I want the extracted audio's pitch modified higher according to the text instruction 'Please raise the pitch of the extracted audio by two semitones'. But first, please rephrase or simplify this instruction into simpler words before voice modification.

Workflow：



Please rate the following content.(1-5 points)

1. Structural Integrity & Logical Flow

2. Functional Requirement Coverage

3. Modality & Type Consistency

4. Resource & Path Optimization

5. Semantic Tool Alignment

6. Operational Robustness

7. Instruction Semantic Preservation

8. Multi-Stage Audio Integrity

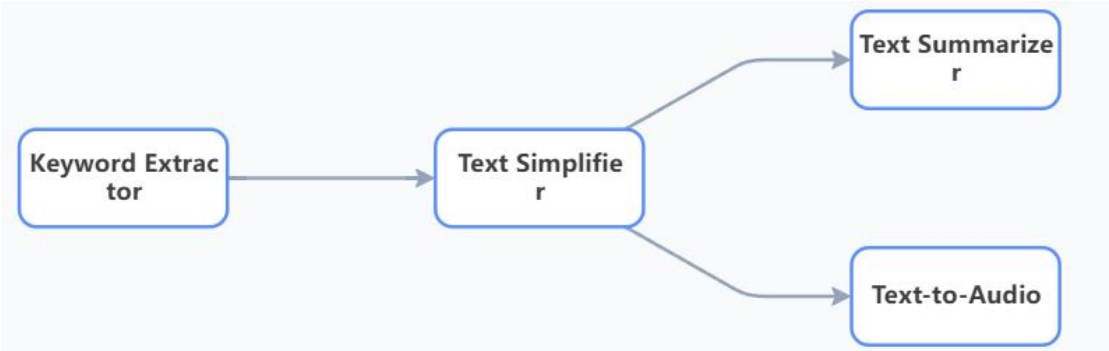
9. Linguistic-to-Acoustic Mapping Accuracy

◇ Task 20

Task Description：

I have a long, complex article about advanced AI technologies. I need a simplified version of the article that highlights the main keywords in a more understandable language. Additionally, I need a summary of that simplified version and an audio file for listening. Please find the text file I attached: 'example.txt'.

Workflow：



Please rate the following content.(1-5 points)

1. Structural Integrity & Logical Flow

2. Functional Requirement Coverage

3. Modality & Type Consistency

4. Resource & Path Optimization

5. Semantic Tool Alignment

6. Operational Robustness

7. Semantic Preservation across Iterative Rewriting

8. Keyword-Centric Content Synthesis

9. Audio-Linguistic Optimization (Prosody Readiness)

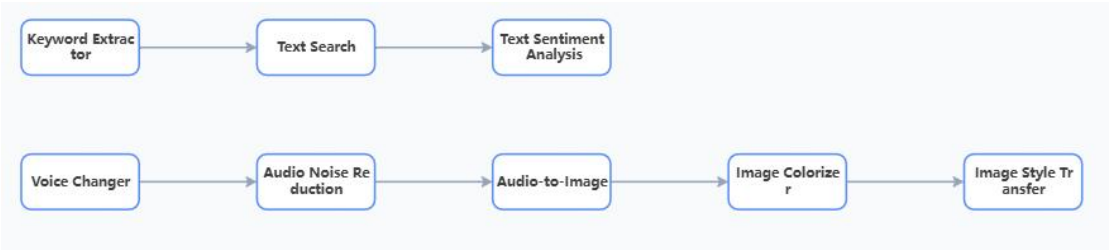
10. Target Audience Linguistic Consistency

◇ Task 21

Task Description：

I want to know the sentiment of the online discussion about the recent movie 'The Turing Test.' Please generate a visual depiction of the sentiment with the emotion expressed in a robotic female voice. Apply the visual style of the image 'example.jpg' to the final result.

Workflow：



Please rate the following content.(1-5 points)

1. Structural Integrity & Logical Flow

2. Functional Requirement Coverage

3. Modality & Type Consistency

4. Resource & Path Optimization

5. Semantic Tool Alignment

6. Operational Robustness

7. Sentiment-Acoustic Expressiveness

8. Visual-Sentiment Semantic Mapping

9. Style-Content Aesthetic Coherence

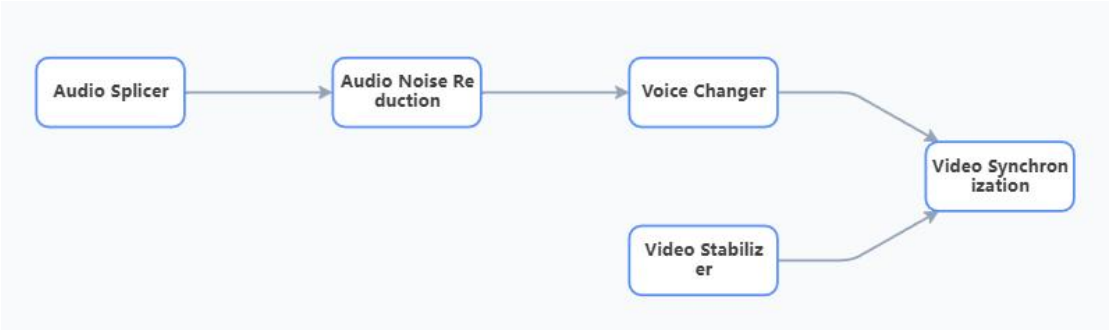
10. Search Query Contextual Precision

◇ Task 22

Task Description：

I have two separate audio files, 'example1.wav' and 'example2.wav', that need to be combined into a single file. The combined audio should have its background noise reduced. Additionally, I would like the voice in the audio to have a higher pitch. Finally, I have a shaky video file 'example.mp4' that needs to be synchronized with the modified voice and stabilized for smoother playback.

Workflow：



Please rate the following content.(1-5 points)=

1. Structural Integrity & Logical Flow

2. Functional Requirement Coverage

3. Modality & Type Consistency

4. Resource & Path Optimization

5. Semantic Tool Alignment

6. Operational Robustness

7. Audio Signal Quality Preservation

8. Temporal Cohesion and Duration Matching

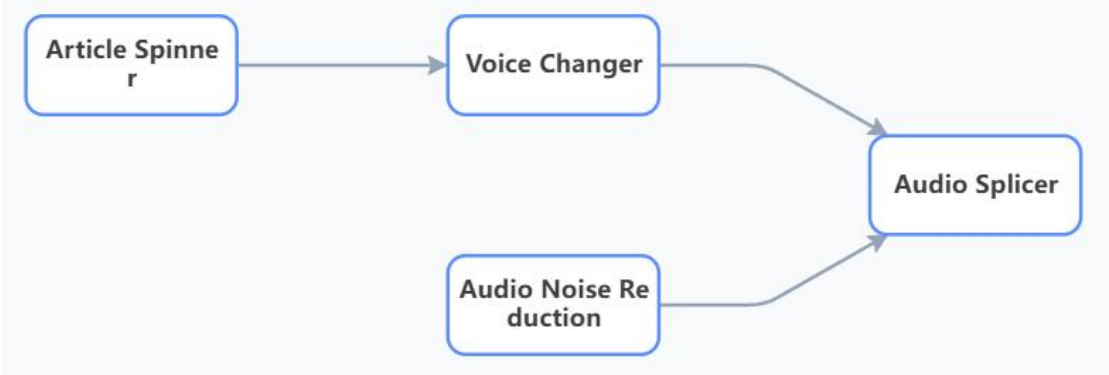
9. Visual-Audio Dependency Sequencing

◇ Task 23

Task Description：

I want to create a unique audio version of a given text article with example.wav background music and reduce any noise from the audio.

Workflow：



Please rate the following content.(1-5 points)

1. Structural Integrity & Logical Flow

2. Functional Requirement Coverage

3. Modality & Type Consistency

4. Resource & Path Optimization

5. Semantic Tool Alignment

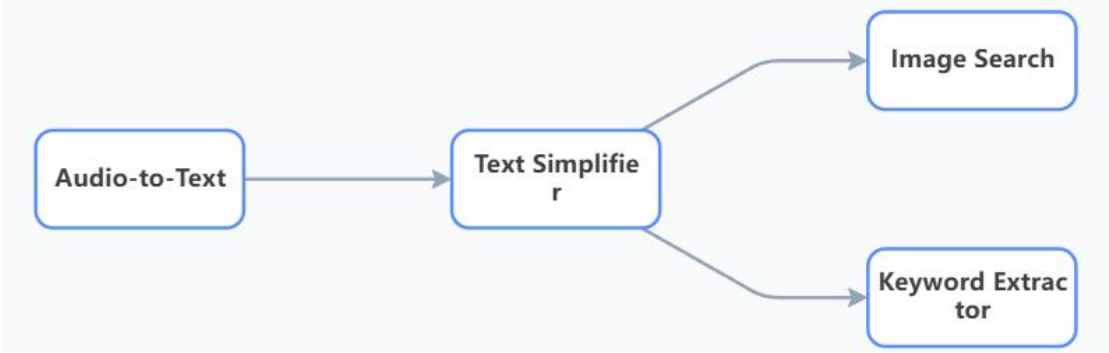
6. Operational Robustness

◇ Task 24

Task Description：

I need help to transcribe the speech from 'example.wav' audio file, rewrite the text in a simpler way, extract the main keywords, and then find related images on the internet.

Workflow：



Please rate the following content.(1-5 points)

1. Structural Integrity & Logical Flow

2. Functional Requirement Coverage

3. Modality & Type Consistency

4. Resource & Path Optimization

5. Semantic Tool Alignment

6. Operational Robustness

7. Semantic Preservation during Simplification

8. Search Query Distillation Quality

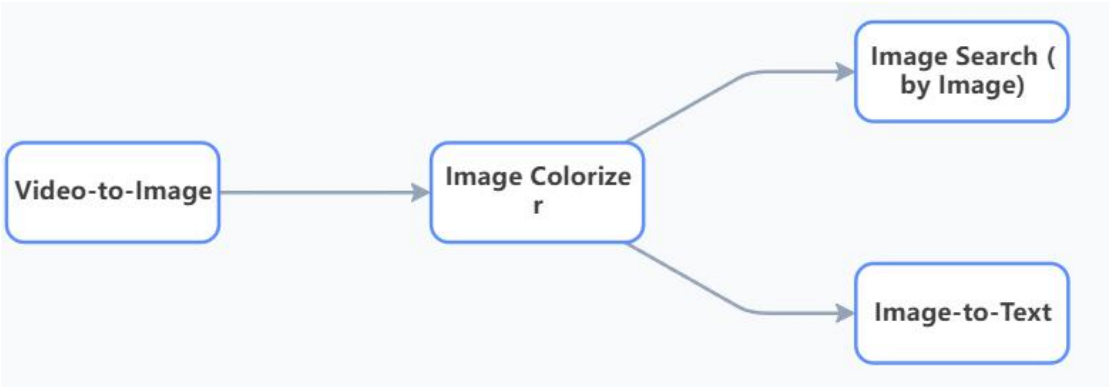
9. Linguistic Accessibility Alignment

◇ Task 25

Task Description：

I have an old black and white video clip, 'example.mp4'. I would like to first extract an image from it, then colorize the image. After that, I need to search for similar images based on the colorized one. Finally, please extract any text that might be present in the colorized image.

Workflow：



Please rate the following content.(1-5 points)

1. Structural Integrity & Logical Flow

2. Functional Requirement Coverage

3. Modality & Type Consistency

4. Resource & Path Optimization

5. Semantic Tool Alignment

6. Operational Robustness

7. Temporal Frame Selection Logic

8. Synthetic-to-Real Search Mapping

9. Restoration-Induced OCR Interference

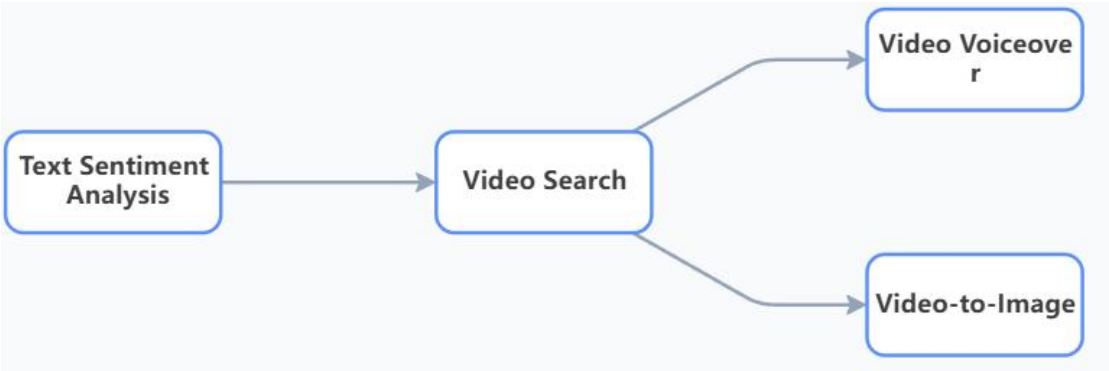
10. Historical Context Preservation

◇ Task 26

Task Description：

User requests to have a positive review about their favorite movie turned into a video with a voiceover using the text. The user provides the following text: 'I absolutely loved the movie Inception! It had an exceptional plot and outstanding visual effects.' Attached file: example.mp4.

Workflow：



Please rate the following content.(1-5 points)

1. Structural Integrity & Logical Flow

2. Functional Requirement Coverage

3. Modality & Type Consistency

4. Resource & Path Optimization

5. Semantic Tool Alignment

6. Operational Robustness

7. Search Query Synthesis

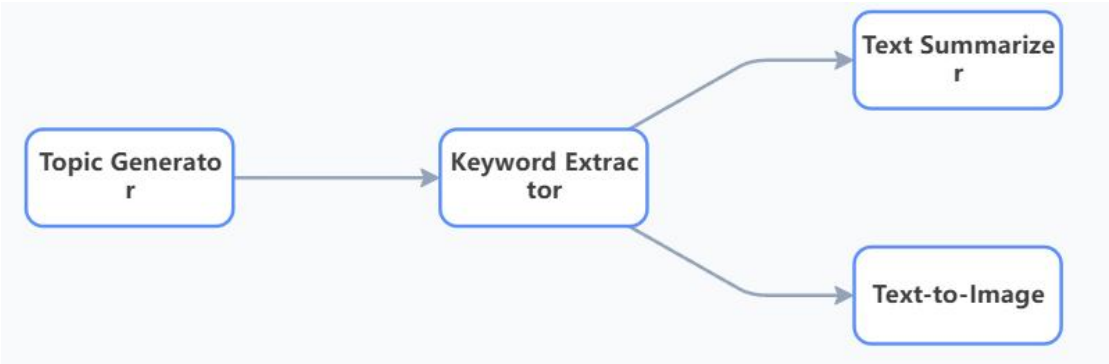
8. Input Asset Reconciliation

◇ Task 27

Task Description：

I would like to have a summarized list of topics related to climate change and also generate an image for each topic. Please use the following text as input: 'Climate change refers to long-term shifts in temperatures and weather patterns. These shifts may be natural, such as through variations in the Earth's orbit, or they may be caused by human activities, such as the burning of fossil fuels and deforestation.'

Workflow：



Please rate the following content.(1-5 points)

1. Structural Integrity & Logical Flow

2. Functional Requirement Coverage

3. Modality & Type Consistency

4. Resource & Path Optimization

5. Semantic Tool Alignment

6. Operational Robustness

7. Information Distillation Fidelity

8. Visual Prompt Descriptive Quality

9. Thematic Mapping and Iteration Integrity

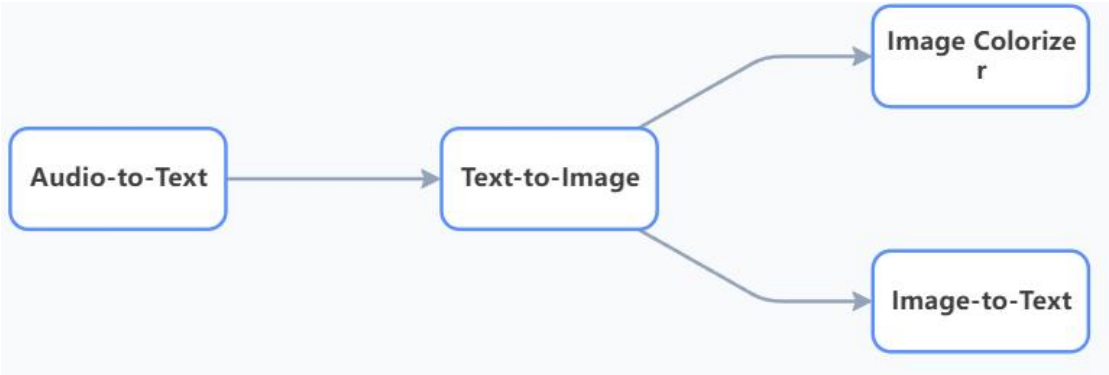
10. Semantic Granularity Balance

◇ Task 28

Task Description：

I have an audio file called 'example.wav' containing an important speech, and I want to create a visual representation of this. Generate an image based on the speech's content and add color. Also, extract the text from the resulting image so I can have a written record.

Workflow：



Please rate the following content.(1-5 points)

1. Structural Integrity & Logical Flow

2. Functional Requirement Coverage

3. Modality & Type Consistency

4. Resource & Path Optimization

5. Semantic Tool Alignment

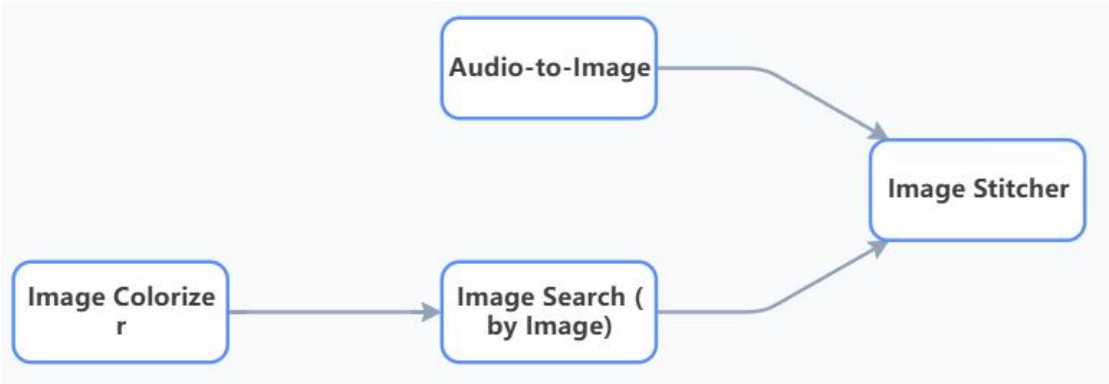
6. Operational Robustness

◇ Task 29

Task Description：

I want to create a unique panorama by combining an audio waveform image generated from example.wav and a visually similar image found via a colorized version of example.jpg.

Workflow：



Please rate the following content.(1-5 points)

1. Structural Integrity & Logical Flow

2. Functional Requirement Coverage

3. Modality & Type Consistency

4. Resource & Path Optimization

5. Semantic Tool Alignment

6. Operational Robustness

7. Aesthetic Composition & Layout Logic

8. Color-Mediated Search Intent

9. Audio-Visual Representation Fidelity

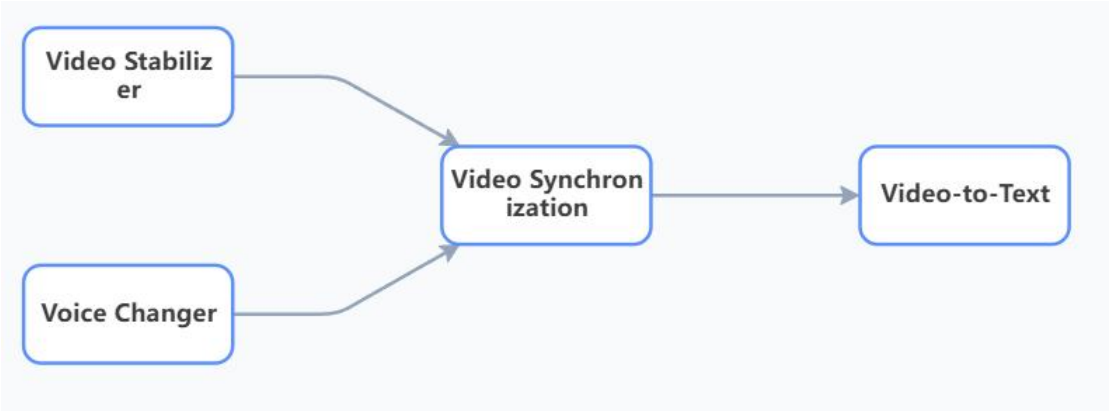
10. Cross-Modal Semantic Consistency

◇ Task 30

Task Description：

I have a video (example.mp4) and a separate voice recording (example.wav) that I want to use as a voiceover. Please help me modify the voiceover's tone, pitch, and gender, then synchronize it with the video. Also, please stabilize the video and transcribe the speech into text.

Workflow：



Please rate the following content.(1-5 points)

1. Structural Integrity & Logical Flow
2. Functional Requirement Coverage
3. Modality & Type Consistency
4. Resource & Path Optimization
5. Semantic Tool Alignment
6. Operational Robustness
7. Voice Modification Fidelity
8. Audio-Visual Synchronization Accuracy
9. Stabilization and Transcription Sequence Logic
10. Multi-Modal Output Consistency
